

**Job: Maintenance Manager – Process Plant - Job Code 2010.04**

**Location: Santa Rosalía, Baja California Sur, México**

### **Objective**

Minera Boleo's Process Plant department has a great opportunity for a Maintenance Manager for its Process Plant.

Reporting to the General Manager – Process Plant, the Maintenance Manager will be responsible for the overall performance of the process plant and infrastructure maintenance activities. This position will ensure that planned and un-planned maintenance programs run smoothly and effectively, while achieving safety & production targets. The Maintenance Manager – Process Plant will also ensure the proper and timely training of the local workforce, emphasizing the training and development of candidates suitable for leadership positions.

### **Key Duties & Responsibilities (include, but not limited to)**

- Lead the implementation of process plant maintenance programs, repair facility and other maintenance related, plans consistent with operational targets.
- Accountable for the effective and planned operating budgets spending and overall process plant maintenance financial performance.
- Accountable for process plant maintenance activities and the maintenance of process plant equipment and assets.
- Accountable for training workforce to perform tasks in efficient manner.
- Engage peers to coordinate plans for efficient handling of health and safety matters at the process plant and the corresponding maintenance plans.
- Interface with any maintenance contracting organization and provide MMB responses to issues, concerns and disagreements.
- Support contractor plans, assists in coordinating process plant and mining maintenance repairs.
- Directly supervise the following positions: Civil Superintendent, Mechanical Superintendent, Electrical Superintendent, Instrumentation Superintendent, and Planning Superintendent.

### **Key Requirements**

- Undergraduate Degree in Engineering (Mechanical and/or Electrical preferred) from a recognized university or equivalent years of successful management of similar organizations.
- Minimum 15 years experience in maintenance operations, with a minimum of five (5) years in a process plant environment.
- Experience in maintenance of rotating machinery (mills), thickeners, sulphuric acid plants and solvent extraction/electro winning plants would be a plus.
- At least 8 years of experience leading, monitoring and coordinating the work of others.
- Effective communicator with demonstrated leadership skills and experience in negotiations.
- Previous experience working in Latin America or other Spanish speaking Countries. Fluency in Spanish is highly desirable.
- Position may be required to travel within Mexico, the United States and to Canada.
